

## Micron Technology, Inc. Reports Results for the Third Quarter of Fiscal 2019

June 25, 2019

### Strong execution drives profitability and free cash flow

BOISE, Idaho, June 25, 2019 (GLOBE NEWSWIRE) -- Micron Technology, Inc. (Nasdaq: MU) today announced results for its third quarter of fiscal 2019, which ended May 30, 2019.

### Fiscal Q3 2019 Highlights

- Revenue of \$4.79 billion versus \$7.80 billion for the same period last year
- GAAP net income of \$840 million, or \$0.74 per diluted share
- Non-GAAP net income of \$1.20 billion, or \$1.05 per diluted share
- Operating cash flow of \$2.71 billion versus \$4.26 billion for the same period last year
- Share repurchases of \$2.66 billion under the authorized buyback program in the first nine months of 2019

"Micron's improved competitive position and strong execution helped us deliver solid results despite a challenging environment," said Micron Technology President and CEO Sanjay Mehrotra. "While we are seeing early signs of demand improvement, we plan to reduce our capital expenditures in fiscal 2020 to help improve industry supply-demand balance."

1. In the first quarter of 2019, we adopted ASU 2014-09 – *Revenue from Contracts with Customers* (as amended, "ASC 606"), which supersedes nearly all existing revenue recognition guidance under generally accepted accounting principles in the United States. The core principal of ASC 606 is that an entity should recognize revenue when it transfers control of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. We adopted ASC 606 in the first quarter of 2019 under the modified retrospective method and, in connection therewith, made certain adjustments to our opening balances as of August 31, 2018. Adjustments to opening balances included an increase to receivables of \$114 million, reduction of deferred tax assets of \$92 million, increase of other current assets of \$30 million, and an increase to retained earnings of \$50 million.

2. On February 6, 2019, we issued \$600 million, \$500 million, and \$700 million in principal of senior unsecured notes due in 2024, 2026, and 2029, respectively. On February 8, 2019, we notified holders of our convertible senior notes due in 2043 ("2043G Notes") that we would redeem all of the outstanding 2043G Notes on March 13, 2019. In connection with our notice, we made an irrevocable election to settle any conversions in cash and, as a result, we reclassified \$336 million from equity to a derivative debt liability. Holders converted substantially all of the 2043G Notes and, on March 13, 2019, we paid \$1.43 billion to settle the conversions. We incurred losses of \$316 million and \$84 million in the third and second quarters of 2019, respectively, in connection with these transactions.

3. On December 22, 2017, the United States enacted comprehensive tax legislation, commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"), which imposed a one-time transition tax in 2018 (the "Repatriation Tax") and created a new minimum tax on certain foreign earnings. Our income tax provision consisted of the following:

	3 <sup>rd</sup> Qtr. May 30, 2019	2 <sup>nd</sup> Qtr. February 28, 2019	3 <sup>rd</sup> Qtr. May 31, 2018	Nine Months Ended	
				May 30, 2019	May 31, 2018
Income tax (provision) benefit, excluding items below	\$ 125	\$ (216)	\$ (78)	\$ (469)	\$ (161)
Utilization of and other changes in net deferred tax assets of MMJ, MMT, and MTTW	(32)	(78)	(35)	(162)	(78)
Repatriation Tax, net of adjustments related to uncertain tax positions	42	14	222	9	(1,113)
Release of the valuation allowance on net deferred tax assets of our U.S. operations	—	—	—	—	1,337
Remeasurement of deferred tax assets and liabilities reflecting lower U.S. corporate tax rates	—	—	—	—	(133)
	<u>\$ 135</u>	<u>\$ (280)</u>	<u>\$ 109</u>	<u>\$ (622)</u>	<u>\$ (148)</u>

The decrease in our income tax provision in the third quarter of 2019 as compared to the second quarter of 2019 was due primarily to a reduction in profit before tax and a related reduction in the foreign minimum tax. The Repatriation Tax and our deferred tax liabilities on unremitted earnings were also reduced in the third quarter of 2019 due to Tax Act-related law changes. Our provision for income tax and the effective tax rate increased in the first nine months of 2019 as compared to the corresponding period of 2018 primarily as a result of the foreign minimum tax.

4. In January 2019, we exercised our option to acquire Intel's interest in our joint venture, IM Flash Technologies, LLC ("IMFT") and, in the third quarter of 2019, Intel set the closing date of the transaction to occur on October 31, 2019. At closing, we expect to pay Intel approximately \$1.4 billion in cash for Intel's noncontrolling interest in IMFT and IMFT member debt. As of May 30, 2019, current debt included \$858 million of IMFT member debt.

5. In the third quarter and first nine months of 2019, we repurchased 4 million shares of our common stock for \$157 million and 67 million shares of our common stock for \$2.66 billion, respectively, under an accelerated share repurchase agreement, Rule 10b5-1 plans, and through open market repurchases. The shares were recorded as treasury stock.

The tables above reconcile GAAP to non-GAAP gross margin, operating income, net income attributable to Micron, diluted shares, and diluted earnings per share. The non-GAAP adjustments above may or may not be infrequent or nonrecurring in nature but are a result of periodic or non-core operating activities. We believe this non-GAAP information is helpful in understanding trends and in analyzing our operating results and earnings. We are providing this information to investors to assist in performing analysis of our operating results. When evaluating performance and making decisions on how to allocate our resources, management uses this non-GAAP information and believes investors should have access to similar data when making their investment decisions. We believe these non-GAAP financial measures increase transparency by providing investors with useful supplemental information about the financial performance of our business, enabling enhanced comparison of our operating results between periods and with peer companies. The presentation of these adjusted amounts varies from numbers presented in accordance with U.S. GAAP and therefore may not be comparable to amounts reported by other companies. Our management excludes the following items in analyzing our operating results and understanding trends in our earnings:

- Stock-based compensation;
- Flow-through of business acquisition-related inventory adjustments;
- Acquisition-related costs;
- Start-up and preproduction costs;
- Employee severance;

- Restructure and asset impairments;
- Amortization of debt discount and other costs, including the accretion of non-cash interest expense associated with our convertible debt and MMJ creditor debt;
- Gains and losses from debt repurchases and conversions;
- Gains and losses from changes in currency exchange rates;
- Gains and losses from business acquisition activities;
- Impact of U.S. income tax reform for the Repatriation Tax, release of U.S. valuation allowance, and remeasurement of net deferred taxes reflecting lower U.S. corporate tax rates; and
- The estimated tax effects of above, non-cash changes in net deferred income taxes, and assessments of tax exposures.

Our outstanding capped call transactions are anti-dilutive in GAAP earnings per share but are expected to mitigate the dilutive effect of our convertible notes. In periods with non-GAAP income attributable to Micron, non-GAAP diluted shares include the impact of capped calls based on the average share price for the period the capped calls are outstanding. Non-GAAP diluted shares are also adjusted for the impact of additional shares resulting from the exclusion of stock-based compensation from non-GAAP income.
