

Micron Hosts U.S. Secretary of Commerce and Congressional and Local Leaders at its State-of-the-Art Manassas, Virginia Fabrication Facility

May 24, 2021 at 11:13 PM EDT

MANASSAS, Va., May 24, 2021 (GLOBE NEWSWIRE) -- Micron Technology, Inc. (Nasdaq: MU), today hosted U.S. Secretary of Commerce Gina Raimondo and Congressional and local officials for a tour of its Manassas, Va., advanced manufacturing facility. The visit underscored the importance of domestic semiconductor manufacturers, and highlighted Micron's position in the industry as the only manufacturer of memory and storage products in the U.S. Secretary Raimondo was joined by U.S. Senators John Cornyn (R-TX) and Mark R. Warner (D-VA) along with Manassas Mayor Michelle Davis-Younger.

In a joint press conference, Secretary Raimondo, Senator Cornyn and Senator Warner highlighted the importance of federal support for the U.S. semiconductor industry, a vital component of the U.S. economy that underpins advancements in critical infrastructure. Micron President and CEO, Sanjay Mehrotra, noted the company's expanding footprint in Manassas and expressed gratitude for the U.S. Government's efforts to further promote innovation and strengthen the domestic semiconductor industry.

"Over the last year, there has been an increased focus on the importance of semiconductors – here in the U.S. and around the world," said Mehrotra. "Semiconductors are the foundation on which the modern economy is built, and the applications they enable have kept America on the leading edge of technology innovation. As the only U.S. company that develops, manufactures, and sells leading-edge memory and storage products, we are energized to see the growing momentum to promote domestic semiconductor investments. The CHIPS for America Act aims to incentivize more manufacturing, R&D and innovation here in the U.S., and we look forward to continuing to work with Congress to see it across the finish line."

Micron's Manassas, Virginia operation serves as a Center of Excellence for the company's long-lifecycle memory and storage solutions that are key to driving growth in the intelligent edge including automotive, industrial, networking and consumer markets. The site plays a critical role in producing memory that is in nearly half of all automobiles today.

About Micron Technology, Inc.

We are an industry leader in innovative memory and storage solutions transforming how the world uses information to enrich life *for all*. With a relentless focus on our customers, technology leadership, and manufacturing and operational excellence, Micron delivers a rich portfolio of high-performance DRAM, NAND and NOR memory and storage products through our Micron® and Crucial® brands. Every day, the innovations that our people create fuel the data economy, enabling advances in artificial intelligence and 5G applications that unleash opportunities — from the data center to the intelligent edge and across the client and mobile user experience.
