June 28, 2023 at 4:04 PM EDT

Further reducing wafer starts to approach 30% in both DRAM and NAND

BOISE, Idaho, June 28, 2023 (GLOBE NEWSWIRE) -- Micron Technology, Inc. (Nasdaq: MU) today announced results for its third quarter of fiscal 2023, which ended June 1, 2023.

Fiscal Q3 2023 highlights

- Revenue of \$3.75 billion versus \$3.69 billion for the prior quarter and \$8.64 billion for the same period last year
- GAAP net loss of \$1.90 billion, or \$1.73 per diluted share
- Non-GAAP net loss of \$1.57 billion, or \$1.43 per diluted share
- Operating cash flow of \$24 million versus \$343 million for the prior quarter and \$3.84 billion for the same period last year

"Micron delivered fiscal third quarter revenue, gross margin, and EPS all above the midpoint of the guidance range," said Micron Technology President and CEO Sanjay Mehrotra. "We believe that the memory industry has passed its trough in revenue, and we expect margins to improve as industry supply-demand balance is gradually restored. The recent Cyberspace Administration of China ("CAC") decision is a significant headwind that is impacting our outlook and slowing our recovery. Longer-term, Micron's technology leadership, product portfolio, and operational excellence continues to strengthen our competitive positioning across diverse growth markets, including AI and memory-centric computing."

Inventories

In the third and second quarters of 2023, we recorded charges to cost of goods sold to write down the carrying value of work in process and finished goods inventories to their estimated net realizable values ("NRV"). The impact of inventory NRV write-downs for each period reflects (1) inventory write-downs in that period, offset by (2) lower costs in that period on the sale of inventory written down in prior periods. The impacts of inventory NRV write-downs are summarized below:

The tables above reconcile GAAP to non-GAAP measures of gross margin, operating expenses, operating income (loss), net income (loss), diluted shares, diluted earnings (loss) per share, and adjusted free cash flow. The non-GAAP adjustments above may or may not be infrequent or nonrecurring in nature, but are a result of periodic or non-core operating activities. We believe this non-GAAP information is helpful in understanding trends and in analyzing our operating results and earnings. We are providing this information to investors to assist in performing analysis of our operating results. When evaluating performance and making decisions on how to allocate our resources, management uses this non-GAAP information and believes investors should have access to similar data when making their investment decisions. We believe these non-GAAP financial measures increase transparency by providing investors with useful supplemental information about the financial performance of our business, enabling enhanced comparison of our operating results between periods and with peer companies. The presentation of these adjusted amounts varies from amounts presented in accordance with U.S. GAAP and therefore may not be comparable to amounts reported by other companies. Our management routinely excludes the following items in analyzing our operating results and understanding trends in our earnings:

- Stock-based compensation;
- Flow-through of business acquisition-related inventory adjustments;
- Acquisition-related costs;
- Employee severance;
- Gains and losses from settlements;
- Restructure and asset impairments;
- Amortization of debt discount and other costs;
- Gains and losses from debt repurchases and conversions;
- Gains and losses from business acquisition activities; and
- The estimated tax effects of above, non-cash changes in net deferred income taxes, assessments of tax exposures, certain tax matters related to prior fiscal periods, and significant changes in tax law.

Non-GAAP diluted shares are adjusted for the impact of additional shares resulting from the exclusion of stock-based compensation from non-GAAP income (loss).
